

## MADISON POLYMERIC ENGINEERING, INC.

At Madison Polymeric Engineering, we design total packages from the inside out. Today's harsh transportation environment demands dynamic packaging to solve the problems encountered by industry. That is why, for more than **30 years**, companies have called on us to manufacture cost-effective packaging solutions to protect their products.

- Custom Roto and Injection molded cases.
- Custom foam inserts in Urethane, Polyethylene and Styrene foams to protect valuable equipment and instruments.
- Divider systems and lid organizers customized to your specifications.
- EMI/RFI shielding and case labeling.
- Silicon O-ring design which seals out water, salt, air and dust.
- Cases can be locked.
- Rack mounted cases and custom applications.
