Shadow Board Tool Trays to Support 5S Workplace

What is 5S? Sort - Set in Order - Shine - Standardize - Sustain

The 5S philosophy focuses on an effective workplace organization and standardized work procedures. A robust 5S program will reduce waste and improve efficiency while improving quality and employee safety.

How to proceed:

- Trace tools on clean white paper sized for the drawer desired
- The better the tracing the better the quality tray
- Scan tracing and email or send tracing to Madison Polymeric
- We will convert tracing to vector file and set computer controlled router or water jet machine tool path.
- Cut the trays!!!

MPE's mission as a manufacturing service company is to support our customers by offering quality products, quick response times, source reductions and JIT delivery schedules. Our enthusiastic staff will always be your ally. Madison Polymeric Engineering...Your Partner in Success!
